

PLASTIC HALLS

- No condensation
- No rust, no mould
- Cartons do not become soft

Storage tents

Plastic halls are for instance used by companies for storage and to gain extra space. Customers renting a storage tent expect their material to be protected from damage such as corrosion and rust. However, in a plastic hall, the climate can be slightly damp with condensation dripping from the ceiling as a result. Moisture can cause damage such as mildew and rust. Although electric parts and corrugated cardboard boxes should be protected against moisture to avoid spoilage.

Remove the cause of the problems

With a dehumidifier can you control the level of humidity in the tent. To avoid mould, the relative humidity should be kept below 70%, and to avoid corrosion, the relative humidity should be kept below 50%. By regulating the humidity within the appropriate range it ensures that the quality of the goods being stored is maintained.

Installing a dehumidifier will allow you to avoid the problems caused by humidity. Seibu Giken DST dehumidifiers require no special maintenance. The unit you should select depends on the size of the premises.

World leaders in dehumidification.

Seibu Giken DST AB

TO SELECT A DEHUMIDIFIER

Seibu Giken DST AB can provide the answer to the specific needs of every application. There is no problem requiring the supply of dry air that cannot be solved. Visit us at www.dst-sg.com and find your nearest technical representatives to discuss your requirements.

Why dehumidify?

Dehumidification of air is an economic and effective way of avoiding problems that moisture can cause, such as rust, condensation, icing, mould and disruptions in production cycles. DST representatives have the experience of dehumidification solutions for everything from; warehouses, refrigerated storage, cleaning up the industry and buildings and climate solutions for the process industry. A regulated level of humidity is also very important when handling hygroscopic ingredients.

Seibu Giken DST AB

DST is a Swedish company, founded in 1985. We are now a leading international supplier of desiccant dehumidifiers. DST has been a subsidiary of Japanese company Seibu Giken Co Ltd since 1993. DST is currently represented in over 40 countries throughout the world. Seibu Giken Co manufactures dehumidifier rotors, VOC rotors, heat exchangers and more.
