

WATER DAMAGE RESTORATION

- Standard sized spigots
- Robust construction but with low weight
- Easy to service

Robust dehumidifiers

Water damage often occurs in narrow and cold buildings. In those kind of environments, the equipment must be robust, easy to install and easy to handle. All Seibu Giken DST dehumidifiers are in stainless steel and are developed to endure tough environments.

Easy to handle

The smallest DST dehumidifier is 12 kg and has one side free from spigots so that it can be placed against a wall. The DR-units may be placed on top of each other and the feet are adjustable. The slide system makes the dehumidifier easy to dismantle for both internal cleaning and service.

Easy to connect

All DST's dehumidifiers for water damage restoration have standard sized hoses to simplify air connections. The AQ dehumidifiers does not need any wet air outlet since it condenses out the water into a container. The container is equipped with a floaters which turns off the unit when the container is full. The water can also be led to nearest drain by a standard flexible hose.

Dehumidification of cold rooms

All DST dehumidifiers for water damage restoration are sorption dehumidifiers and operate below 0°C.

Large mobile dehumidifiers

Large dehumidifiers get mobile with wagons. For serious water damage, the AQ is often used and it can be equipped with a wagon which can easily be mounted and dismantled.

Seibu Giken DST AB

TO SELECT A DEHUMIDIFIER

Seibu Giken DST AB can provide the answer to the specific needs of every application. There is no problem requiring the supply of dry air that cannot be solved. Visit us at www.dst-sg.com and find your nearest technical representatives to discuss your requirements.

Why dehumidify?

Dehumidification of air is an economic and effective way of avoiding problems that moisture can cause, such as rust, condensation, icing, mould and disruptions in production cycles. DST representatives have the experience of dehumidification solutions for everything from; warehouses, refrigerated storage, cleaning up the industry and buildings and climate solutions for the process industry. A regulated level of humidity is also very important when handling hygroscopic ingredients.

Seibu Giken DST AB

DST is a Swedish company, founded in 1985. We are now a leading international supplier of desiccant dehumidifiers. DST has been a subsidiary of Japanese company Seibu Giken Co Ltd since 1993. DST is currently represented in over 40 countries throughout the world. Seibu Giken Co manufactures dehumidifier rotors, VOC rotors, heat exchangers and more.
